Problem Statement

India's gig workers face income instability due to external disruptions like extreme weather, pollution, and traffic conditions. These uncontrollable factors reduce their working hours, causing 20–30% loss in weekly earnings. Currently, there is no system that provides income protection for such situations, leaving them financially vulnerable.

Gig Workers Empathy Questions with Answers

ZEPTO

Q: Can you describe how your daily earnings pressure affects your experience during a shift?

A: It makes me constantly rush and worry about missing incentives, which increases stress.

Q: What usually goes through your mind when traffic delays your delivery?

A: I feel anxious about being late and losing ratings or bonuses.

Q: Can you share an experience where weather conditions made your work difficult?

A: Heavy rain once slowed me down and made deliveries unsafe and exhausting.

Q: What challenges do you face when trying to locate a customer's address or apartment?

A: Incorrect or unclear addresses waste time and delay deliveries.

Q: How do you feel when order delays happen due to issues at the store?

A: It's frustrating because customers may blame me for something I can't control.

Q: What is your experience when the app or internet does not work properly during a delivery?

A: It creates confusion and delays since I depend on the app for directions and updates.

Q: How do you balance your personal safety with the need to deliver orders quickly?

A: I try to be careful, but sometimes I feel pressured to take risks to save time.

Q: Can you describe your experience interacting with support when issues arise on the road?

A: Support responses are often slow, which adds to the stress during deliveries.

Q: How do external conditions like weather or road situations affect your work presentation?

A: Bad weather or roads can make me look unprofessional even if it's not my fault.

Q: What changes would make your work feel easier or less stressful?

A: Better app support, accurate routing, and fair handling of delays would help a lot.

INSTAMART

Q: How does the need to earn consistently affect your daily routine and decisions?

A: I prioritize more orders and longer hours to maintain stable earnings.

Q: Can you describe your experience delivering items that may get damaged or spoiled?

A: I feel stressed when delays might cause items to spoil, affecting customer satisfaction.

Q: What challenges do you face while picking items in the store?

A: Items are sometimes missing or misplaced, which slows down the process.

Q: How do you feel when delays happen even after managing your time well?

A: It's discouraging because my effort doesn't always reflect in results.

Q: What do you usually do when you lose access to maps or navigation during a delivery?

A: I rely on memory or ask locals, which wastes time and increases stress.

Q: How do you handle situations where parking or traffic rules slow you down?

A: I try to follow rules, but it often conflicts with delivery time pressure.

Q: How do customer ratings impact your motivation or stress levels?

A: Low ratings can be demotivating and affect my income opportunities.

Q: What has your experience been with payment clarity and weekly earnings?

A: Sometimes it's unclear, and I worry about whether calculations are accurate.

Q: How do you feel when the app does not warn you about delays or traffic issues?

A: It reduces my trust in the system and makes planning harder.

Q: What physical or vehicle-related challenges do you experience in your work?

A: Long hours and heavy loads cause fatigue and vehicle wear and tear.

BLINKIT

Q: How does your work schedule affect your personal or family life?

A: Long and irregular hours leave little time for family or rest.

Q: Can you describe your experience when there are issues with order readiness at pickup locations?

A: Waiting for orders wastes time and affects my delivery performance.

Q: What challenges have you faced while working in extreme weather conditions?

A: Extreme heat or rain makes the job physically exhausting and risky.

Q: How do you feel when finding a customer's location takes longer than expected?

A: It's frustrating because it delays deliveries and affects ratings.

Q: How do you manage the balance between safety and speed during deliveries?

A: I try to stay safe, but deadlines often push me to hurry.

Q: What kind of support or features would help you plan safer or faster routes?

A: Real-time traffic and weather updates would make a big difference.

Q: How do unexpected situations (like rain or road conditions) affect your confidence at work?

A: They make me feel less in control and more stressed.

Q: What do you do when you face app issues or lose connectivity during a delivery?

A: I try to manage manually, but it slows me down and causes confusion.

Q: How has your experience been with getting timely help from support teams?

A: Help is not always quick, which adds to delivery pressure.

Q: How important is payment clarity and accuracy to your overall job satisfaction?

A: It's very important because my trust in the job depends on fair payments.

Personas

Zepto Delivery Partner Persona

Insights

- Gig workers depend heavily on daily/weekly earnings
- External factors like weather and traffic directly impact income
- Workers feel stress due to rating pressure and delivery deadlines
- There is no financial safety net during disruptions
- App issues and lack of real-time alerts increase uncertainty
- Workers want reliable support and predictable earnings

Solution/Idea

AI-Powered Parametric Insurance Platform

We propose an AI-based system that provides **automatic income protection** to gig workers when external disruptions occur.

How it works:

- Monitors real-time data (weather, pollution, traffic)
- Detects disruptions using AI
- Automatically triggers payouts when conditions cross limits
- Provides weekly subscription-based insurance plans

Key Features:

- No claims process (fully automated)
- Instant payouts
- Fraud detection using AI
- Simple weekly pricing model
